Grand Opening

of the new **Komori Graphic Center Europe**

14, 15 and 16 October 2015

KOMORI

We are pleased to invite you to the Grand Opening of the new Komori Graphic Center - Europe in Utrecht, on Wednesday 14th, Thursday 15th and Friday 16th October. In the presence of Mr Satoshi MOCHIDA, the President and COO of Komori Corporation, this significant event in the history of Komori International (Europe) will celebrate the extension and total refurbishment of the European Graphic Center.

The opening of the new KGC-E reaffirms Komori's confidence in the future of European print and strong will to pursue its huge investment in new technologies. The renewal programme not only allowed the floor space and the overall operational capacities of the KGC-E to be doubled but it also reinforced its functions of state-of-the-art showroom with thematic corners, a Printing College, a Creative Lounge and outstanding demonstration, education, R&D and training facilities.

The 3-day celebration Open House will allow Komori Europe to demonstrate 4 presses and the Komori DoNet environment. You will also be offered personalized presentations on Komori Packaging equipment, PrintOnDemand solutions, H-UV technology, and Added Value Printing.

Register now with Kemtek. Contact Karen Stretch on 011 624 8092 or email, karens@kemtek.co.za

PrintOnDemand Zone

Komori is facilitating short runs and quick turnarounds by shortening makeready time, cutting paper waste and reducing the printing process to the absolute minimum while maintaining the high print quality and productivity of offset printing. The core of Komori's revolutionary new PrintOnDemand system is the fusion of the KHS-AI integrated quick startup system and the award-winning H-UV innovative instant drying technology. The result, PrintOnDemand, is the ultimate short run and quick turnaround solution for today's highly competitive printing marketplace.

Packaging Printing Zone

Discover the latest trends in the packaging and cardboard industries, one of the most promising future-oriented markets. Learn all about coating and special applications for packaging printing, added value in packaging business as well as low energy and other drying applications. Experience live demonstrations on a 6-colour Lithrone GX-40, equipped with a coating unit and numerous devices and systems supporting package printing. They will enlighten the exceptional benefits of the Komori technology not only for the production quality and efficiency but also for the profitability of all packaging printers.

PESP Zone

Komori has evolved from a specialist printing press manufacturer to a Print Engineering Service Provider (PESP). It has expanded the new potential of printing by offering a full range of offset and digital software, materials and equipment. Under the PESP banner, discover the K-Supply new products and the KomoriKare new service offers to optimize the efficiency and profitability of your press room.

Added Value Zone

Get inspired by the endless possibilities of offset printing and discover the large range of Komori technologies and applications to enrich your printing. The best synergy between the right equipment, supplies and knowhow will allow you to differentiate and open new business opportunities. Komori solutions deliver high value and quality as well as efficient printing with beautiful colours and effects to accommodate your increasingly diverse and deluxe printing needs.
